

Look good while supporting turf research

It's an exciting time to be associated with the UNL Turfgrass Science Program. We are continuing construction and establishment of turf research plots on East Campus and will be hosting the 2016 Summer Turf Field Day in Lincoln next summer. The undergraduate curriculum has also been re-examined and improved to ensure our grads will leave UNL with the skills required for a successful career in the turfgrass industry. Finally, we are re-hiring our Integrated Turfgrass Science faculty position and will have that position filled in 2016. These changes would not be possible without the continued support of the Nebraska turfgrass industry. Revenue generated from NTA memberships, the Winter Turf Conference, and Summer Field Day directly supports the UNL Turf research and extension programs. Thank you for your continued support of UNL Turf!

Show your pride in our program by wearing some great looking UNL Turfgrass Science apparel. We are selling golf shirts, hats, and very stylish jackets. All items are embroidered with the Nebraska logo above the words "Turfgrass Science." All proceeds will help with construction of the new turf research plots on East Campus. Shirts (red or black) and black jackets come in both men's and women's sizes. Hats are available in black, red trucker-style, or camo. Pick-up your order at the NTA Golf Outing at Wilderness Ridge on Monday, October 12th (order must be placed by Thursday, September 24th) or at the Turf Conference this January. It would be great to see our loyal members wearing their new UNL Turf gear at local, regional, and national conferences this winter.
