

Early bird conference registration about to expire

November 26, 2018

We are six weeks away from the start of the 2019 Nebraska Turf Conference in LaVista, NE. The Turf Conference is a great way to connect with industry peers, meet vendors, and learn about the latest turfgrass management research. It's also an easy and convenient way to earn your pesticide applicator recertification training (every three years) and GCSAA credits. Building off the success from last year, we'll again be offering a local brewery tour on Wednesday night. This event includes pizza, bus transportation, and stops at four local breweries.

We've worked hard to assemble a diverse set of topics for the 2019 Turf Conference. Different tracks on Wednesday and Thursday include the latest in turf cultivation, business and HR management, turfgrass performance, and tree and landscape maintenance. Featured speakers include Dr. Jim Murphy from Rutgers University, Dr. Adam Thoms from Iowa State University, and Mark Johnson from the GCSAA. Chris Zugel, from Whistling Straits Golf Course, and Dan Blank and Eric Williams from TD Ameritrade Park, will lead the Wednesday afternoon keynote addresses.

For those attending Pesticide Recertification on Tuesday, remember that the *required* core training session takes place from 9:30 to 11:00am. Then recertification continues during the normal afternoon sessions from 1:00 to 3:45. The morning Core Recertification session is included with the one-day or full conference registration fee. *Attendees needing recertification will need to leave any preconference workshops early to attend the required core session at 9:30am.*

We hope you're joining us for conference next January. Register online at www.nebraskaturfgrass.com/conference. Early bird registration pricing ends December 1st and the discounted hotel rooms quickly become booked. Register today!
