

## Learn about low-maintenance roughs at the Nebraska Turf Conference December 14, 2017

The Nebraska Turf Conference is only four weeks away, and we have amassed a great list of featured speakers and diverse content. Among our guests will be Dr. Jared Hoyle, Assistant Professor and Extension Turfgrass Specialist at Kansas State University.

**Figure 1.** Experimental plots in a naturalized area at Colbert Hills Golf Course in Manhattan, KS (by Jared Hoyle).

Dr. Hoyle primarily studies cultural and chemical weed management at Kansas State, but also has active projects exploring the establishment and management of low-maintenance turf areas. He will first speak during the Sustainability Workshop on the morning of January 9<sup>th</sup>, and will focus on the selection, establishment, and management of naturalized areas and low-maintenance roughs on golf courses. After lunch, Dr. Hoyle will speak about newer herbicides in the turf market.

We look forward to seminars from Dr. Hoyle and our other featured speakers, and hope to see you January 9-11.
