

**Field Day will have a new look this year  
June 7, 2018**

*You won't want to miss this year's turfgrass field day!* Several years ago the turf program added a new research location on the UNL campus. We will again have an exciting and informative morning program at the UNL location, followed by our signature and legendary gourmet hot dog lunch. New this year is an afternoon program at our newest addition to research and educational opportunities. The Jim Ager Golf Course and the University of Nebraska Turfgrass Program have partnered to provide a unique apprenticeship opportunity for senior students majoring in Turf and Landscape Management. Advanced students in the program have been placed in charge of all aspects of turf care the Jim Ager Golf Course. It's a great opportunity for the students to hone their skills and build confidence before graduation. The Lincoln City Golf program is pleased to work closely with faculty and students of the University of Nebraska-Lincoln Turfgrass program in this endeavor. Additionally, the UNL turf program has the exciting opportunity to conduct research at this real world setting. Our afternoon field day program this year will feature our beginning efforts in this adventure. Learn more at this year's dual location field day on July 18. Early registrants have the opportunity to play golf on the facility and see the great work the students are doing. Agenda and registration can be found at [turf.unl.edu](http://turf.unl.edu).
