

Help guide the future of our weed and disease research program

July 28, 2016

What weeds, diseases, and insects affect your turf most frequently and severely? Do you have turf pest management questions that you feel have gone unanswered in the past? In general, how can our turf pest management research program improve?

I don't want to assume anything concerning the direction of future research investigations. Please help guide the future of integrated turfgrass management research at the University of Nebraska-Lincoln by completing the short 11-question survey located at the following link:

<https://www.surveymonkey.com/r/unlturfweeds>

It should only take a few minutes. Help us help you.

Cole Thompson, Assistant Professor, Integrated Turfgrass Management Specialist, cole.thompson@unl.edu
