

**Golf Jim Ager at Field Day  
July 3, 2018**

The University of Nebraska Turfgrass Research Field Day is only two weeks away. We are looking forward to a fun day with morning research tours at the expanding East Campus Turf Research Plots, lunch and a tradeshow on East Campus, and then afternoon walking tour of high maintenance turf research being conducted at Jim Ager Memorial Golf Course. In addition to UNL turf faculty, staff and students, Dr. Doug Soldat from the University of Wisconsin-Madison will be presenting at Field Day. He'll discuss his research on lawn management and weed competition in the morning session and potassium fertilizer in topdressing sand during the afternoon session. The full description of the Research Field Day schedule can be found [here](#).

We're excited to showcase Jim Ager Memorial Golf Course after lunch. This Lincoln Parks and Recreation par-3 golf course is being managed by UNL students. It's a great way for our students to gain leadership experience and apply our research finding to an actual golf course. Recent turf program student, Andrew Getty, has been working tirelessly to provide a great golfing experience at Ager. Here's more of his story: <https://turf.unl.edu/turfinfo/6-7-Ager-Apprenticeship1.pdf>

We'd love for the Field Day attendees to experience the fruit of Andrew's labor by participating in our Two-Person Scramble tournament after the afternoon sessions. Proceeds will go to support turf research and this unique educational program. There are a limited number of tee times, so please register as soon as possible. We look forward to seeing you there.
