

Don't forget to register for this year's turfgrass field day!!

July 30, 2019

The Nebraska Turfgrass Research Field Day is scheduled for August 14 at the East Campus Turf plots. We realize this is much later than “normal”. The late schedule will allow a closer look at our herbicide and cultivar trials where the summer months help identify the winners from the losers! We will also be presenting information on wildlife damage and control, remote sensing of nitrogen use and water stress, fertility and brown patch management, soil water infiltration and a bit of a deviation from our turf work, breeding efforts in hops and ornamental millet. We will also have stops regarding EAB in ash trees and turfgrass diagnostics. You won't want to miss it! Per tradition, the gourmet hotdog lunch will be provided by Wahoo Locker (wahoolocker.com). For more info and to register go to <https://nebraskaturfgrass.com/field-day>

Roch Gaussoin, Professor and Extension Turfgrass Specialist, rgaussoin1@unl.edu
