

**Check out the UNL Turf YouTube Channel**

**August 19, 2016**

We have received a lot of good feedback from our Turf iNfo articles over the years. I'm thankful that Dr. Cole Thompson has started on as our new Integrated Turfgrass Management Specialist and can help write even more timely articles; writing 50+ a year takes a lot of time for one person. We plan to continue to write these articles well into the future. Your feedback on how we can improve them is always appreciated.

This year, we wanted to expand our reach beyond Turf iNfo articles and produce videos focused on turfgrass management, research, and program activities. These videos will not take the place of traditional articles and should be complementary. They are posted on our YouTube channel, [www.youtube.com/unlturf](http://www.youtube.com/unlturf). If you are unfamiliar with YouTube, you can subscribe to a particular channel and then you'll be notified when new videos have been posted. I also post new videos to our Twitter account, @UNLTurf. Some of our most popular videos are listed below.

**Bill Kreuser, Assistant Professor and Turfgrass Extension Specialist, [wkreuser2@unl.edu](mailto:wkreuser2@unl.edu)**

[eTurf iNfo: Keeping turf cool with technology](#)

[eTurf iNfo: The heat is on](#)

[eTurf iNfo: The nitrogen sun connection](#)

[Iron-layer formation in sand root zones](#)
