

Hotels and Conference Workshops Filling Up

December 14, 2015

We are only a few weeks away from the start of the 2016 Nebraska Turf Conference in LaVista, NE. The morning workshops on Tuesday, January 12th and the hotel rooms are starting to fill up quickly. The *Hydraulic and Electric Troubleshooting* workshop hosted by Dan Latture of Midwest Turf is a great course to sharpen your equipment troubleshooting and repair skills. New this year, Glen Obear will be leading a workshop designed to help understand soil and water test results called *Interpreting Soil & Water Test Results: Clearing the fog*. Participants for that seminar will need to bring their soil and water test reports to the workshop for analysis and to develop a management plan. Both of these workshops are capped to 25 and are fairly popular. There is also a *Lawn Care Operator* workshop and the introductory sessions for pesticide recertification on Tuesday morning. The conference has been approved for pesticide recertification credit in the states of Nebraska, Iowa and South Dakota.

We've heard your feedback and hope the changes to the 2016 Nebraska Turf Conference make it more productive and enjoyable for everyone. Register online today at www.nebraskaturfgrass.com to get signed up before the workshops and hotels are full.

Happy holidays and we look forward to seeing you in 2016!

Bill Kreuser, Assistant Professor, Extension Turfgrass Specialist, wkreuser2@unl.edu
